

Description

[Wheel and Rim Bumper]

DETAILED DESCRIPTION

[0001] The Wheel and Rim Bumper is comprised of two circular pieces: An outer piece and an inner piece to secure on rims of vehicles. The outer piece is a protective piece while the inner piece is designed to connect the rim to the outer protective layer. The securing effected by the instant invention is particularly designed to prevent damages of wheels and rims on vehicles. It can also be a decorative piece for the vehicle.

[0002] It is desirable for owners to protect their vehicles from scratches and damages while driving and parking. Accordingly, a device, constructed in accordance with the instant invention is capable of providing the protection against damages for wheels and rims of vehicles while in motion. The Wheel and Rim Bumper is designed to be disposable and easily replaceable to maintain a cost and time effective solution for owners to protect their vehicles.
